(54) Title: AN OSTOMY SUPPORT GARMENT

(57) Abstract: An ostomy support set comprising a garment having a first
hole for receiving a stoma, said hole having a stabilised edge, and a disc for
providing the supporting effect of the material removed for forming the first
hole, said disc having a second hole for receiving the stoma wherein the disc
has an outer diameter greater than the diameter of the first hole provides a snug
fit to the stoma, ensures an easy application and removal of the garment and
of a collecting bad combined with a sufficient support next to the stoma.
